

General Project Analysis

11 sites contributing data

145 patients

517 treatments

1944 individual uses reported

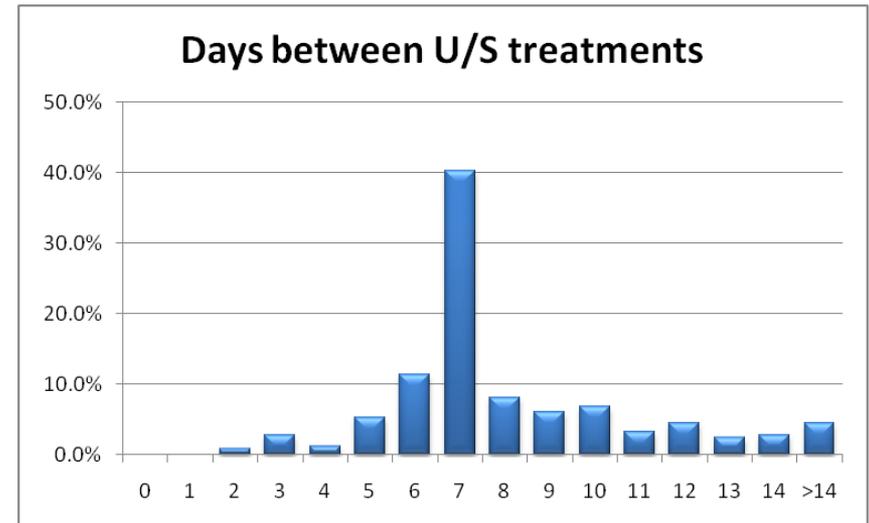

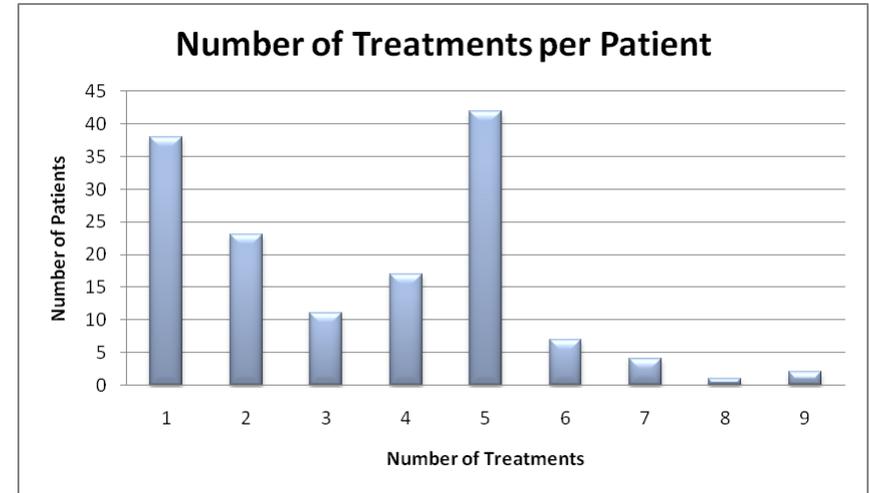

- Ultrasound
- Zonal massage

Ultrasound treatments

Most patients have between 1 and 5 ultrasound treatments

- Some sites are bringing patients back for lymphatic drainage
- Others are allowing patients to do at home

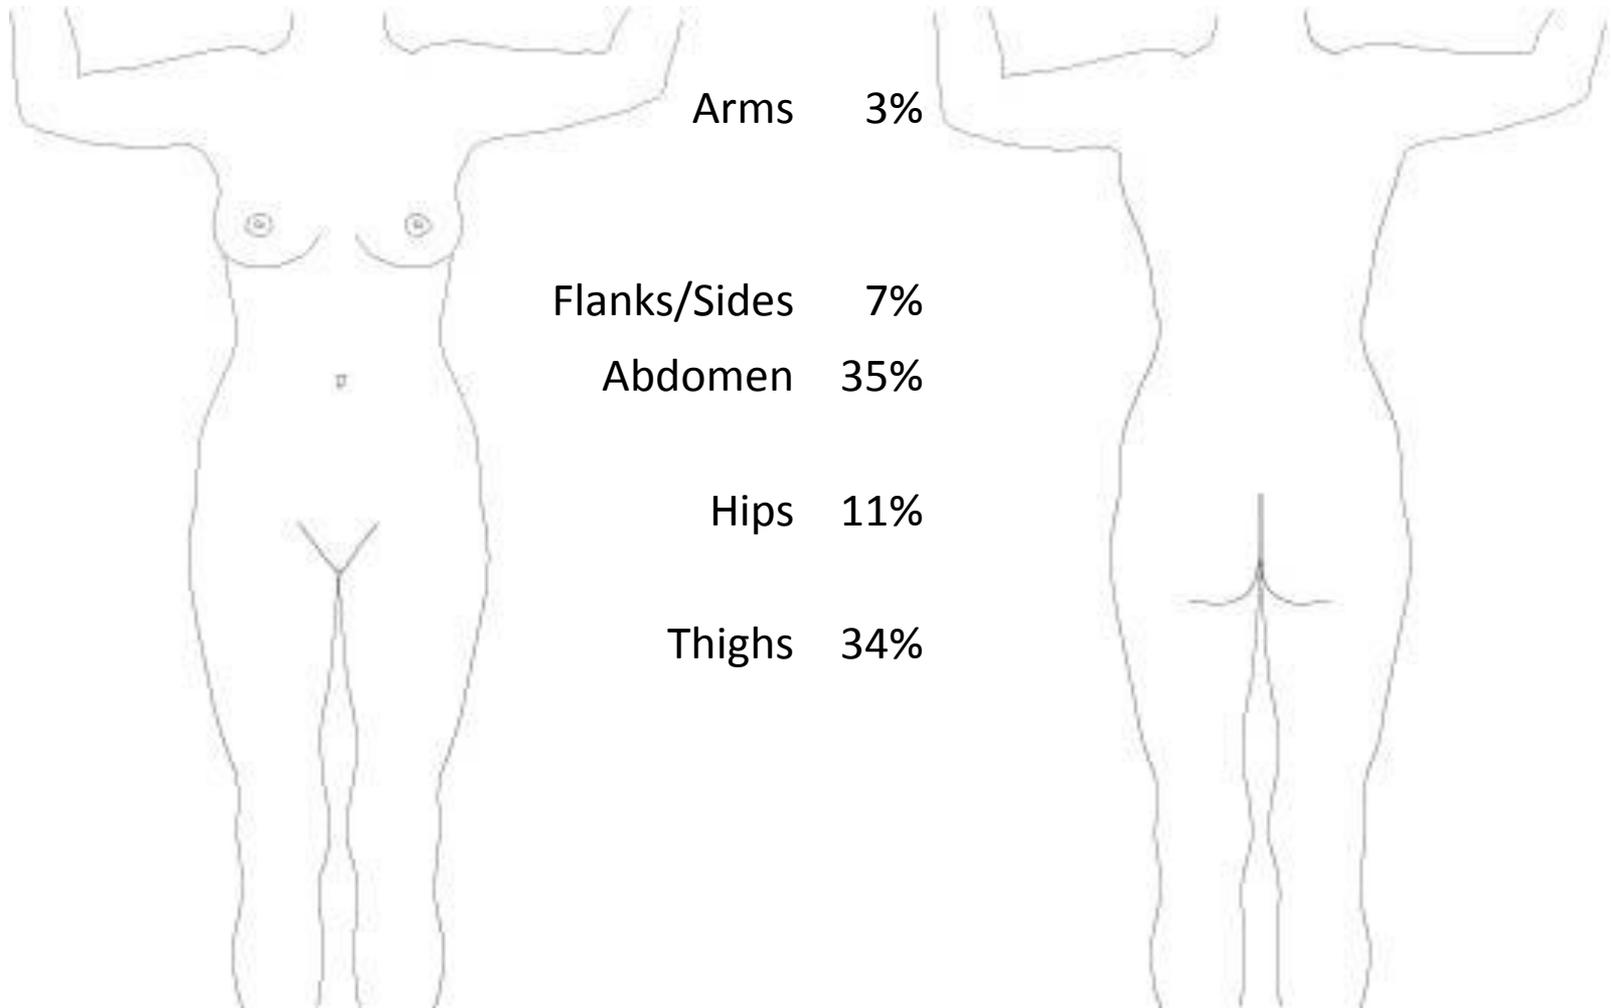

Most patients are brought back weekly for ultrasound treatment

Outcomes – anecdotal reports

- Most patients see effects within the treatment session
 - Pants/dress/clothes fit better
 - Skin feels tighter
- Patients experience warming feeling during treatment
- Skin effects
 - Redness and any edema resolve within hours
 - Some small discolored marks reported – resolve in days
 - No permanent marks with latest version of ultrasound heads
- Cellulite
 - Sites report change in cellulite appearance
- More fibrous areas are harder to treat

Change at first visit

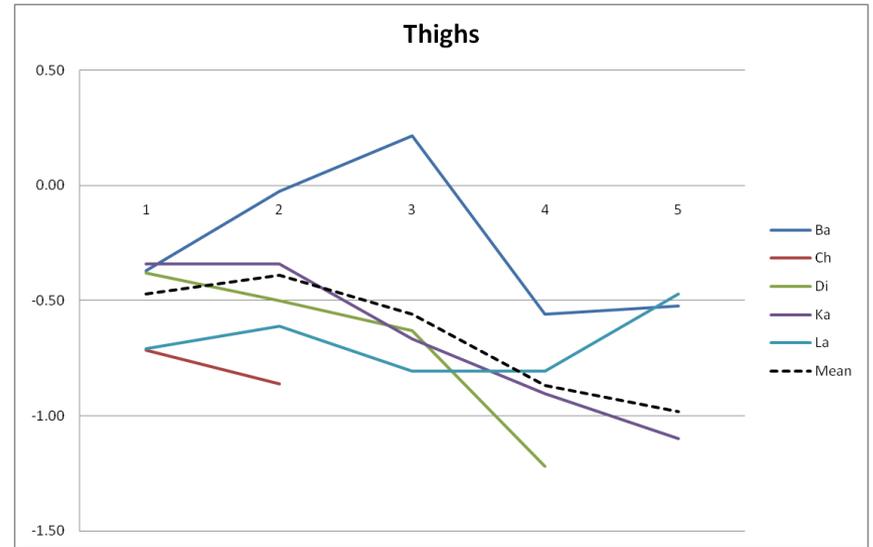

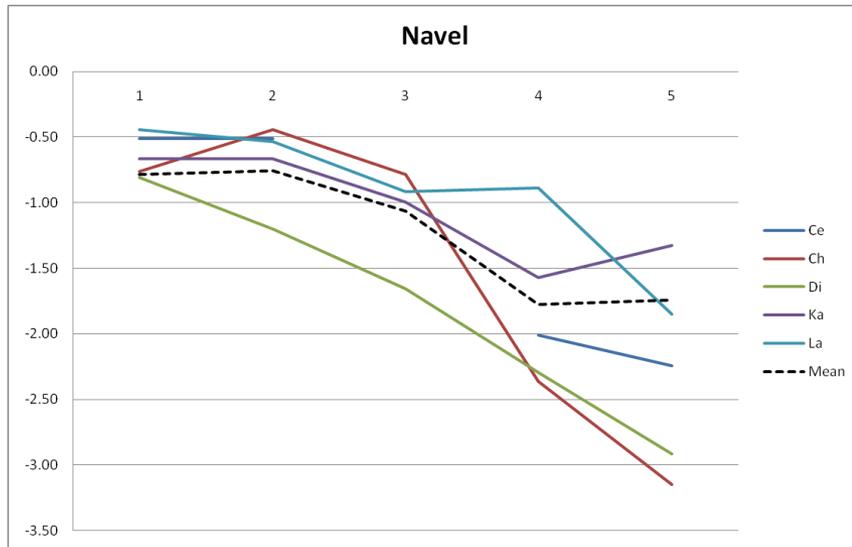

*Mean, max, min

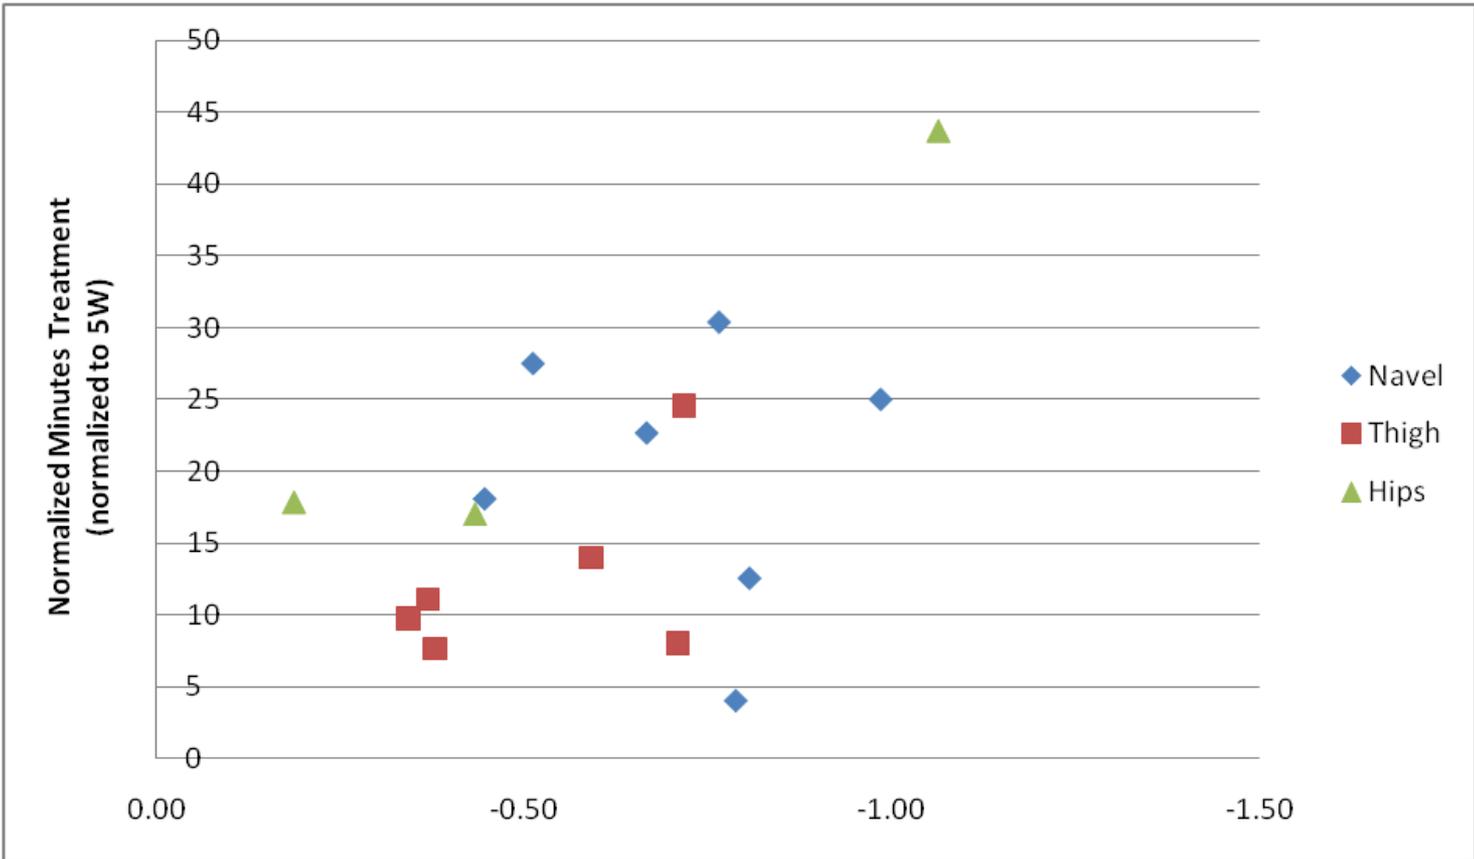

Mean change from baseline

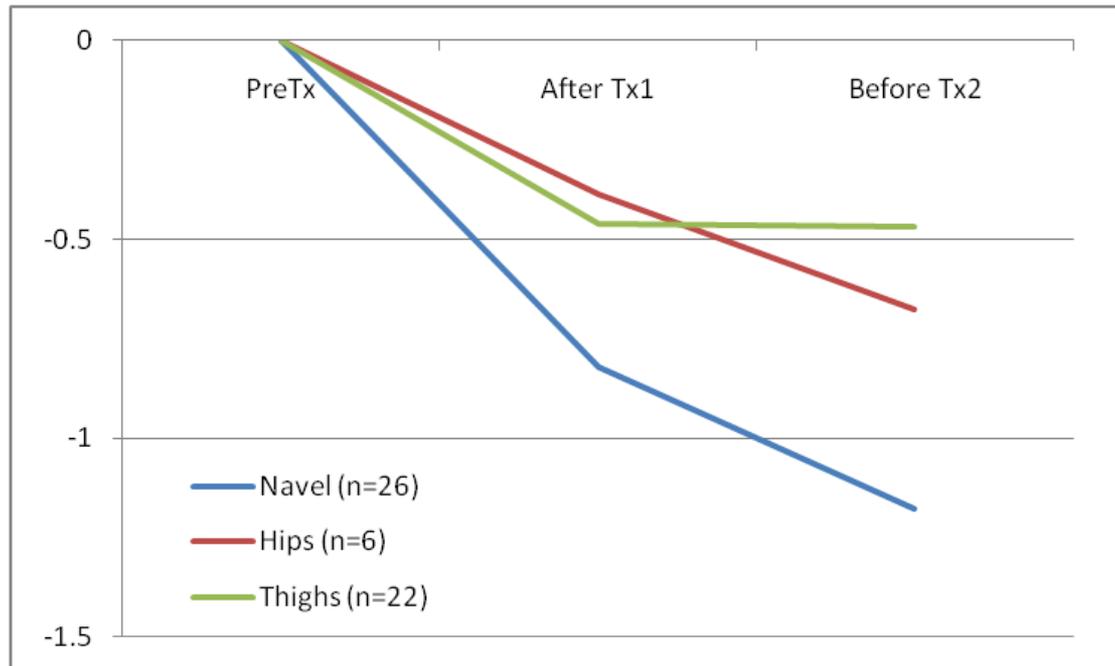

Site results across visits

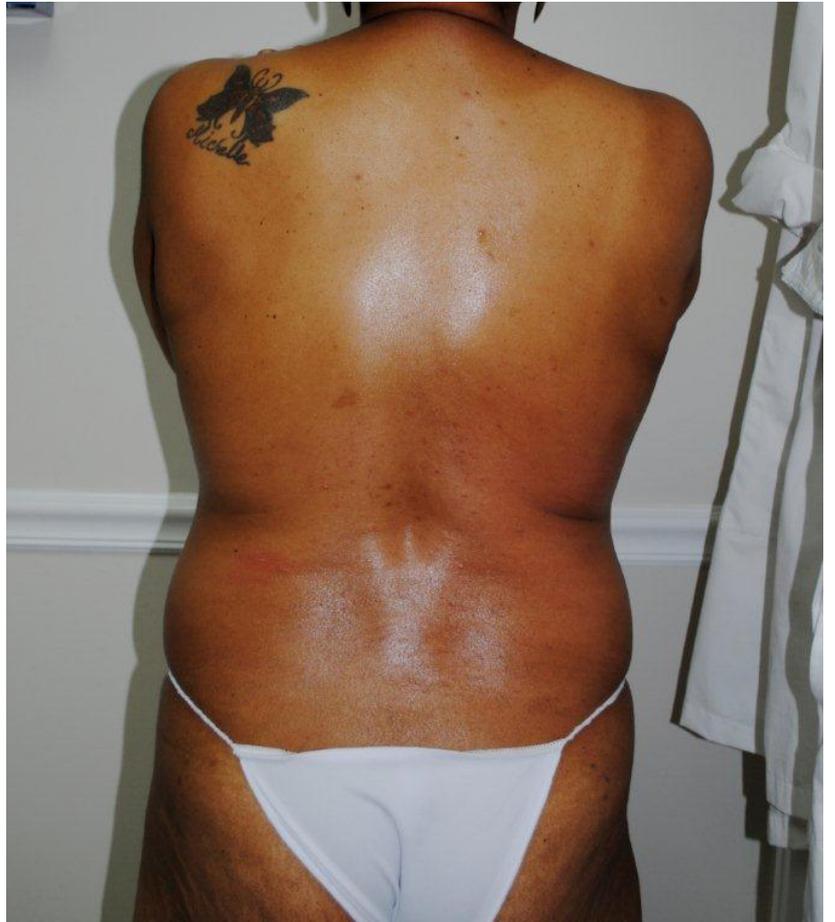

Length of first treatment

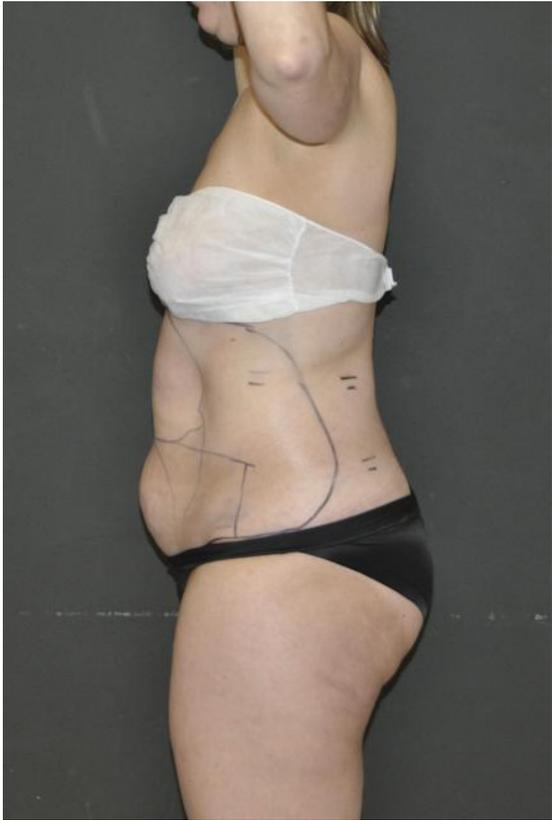

Does the effect continue between visits?

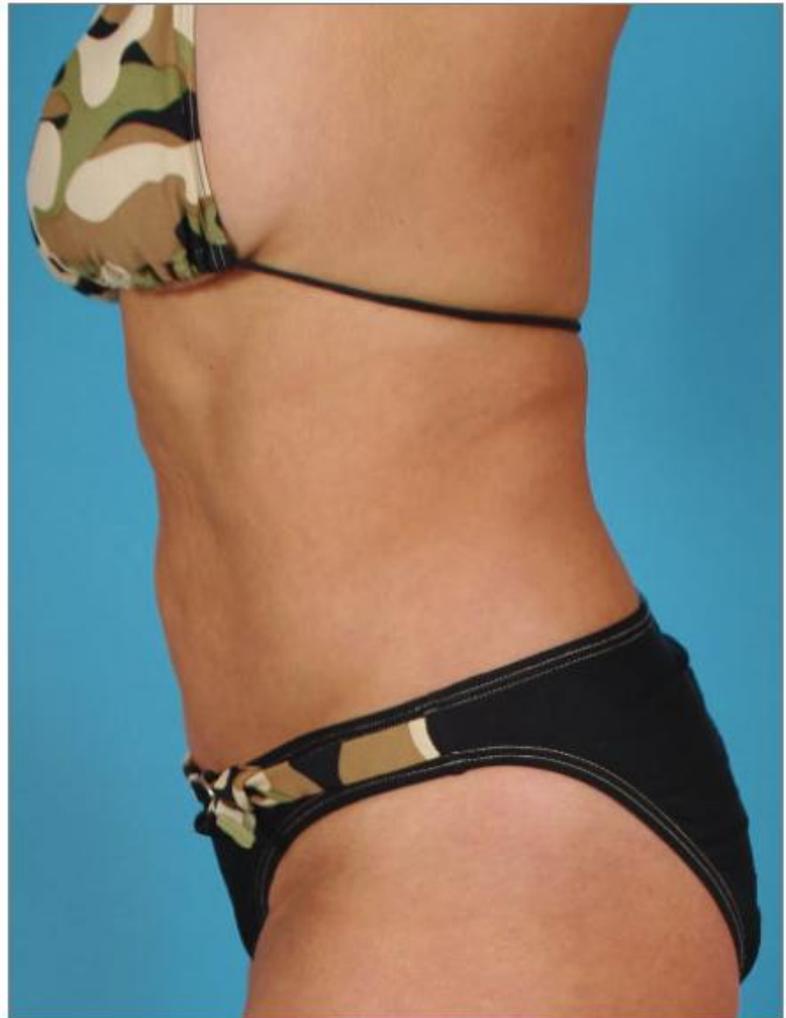

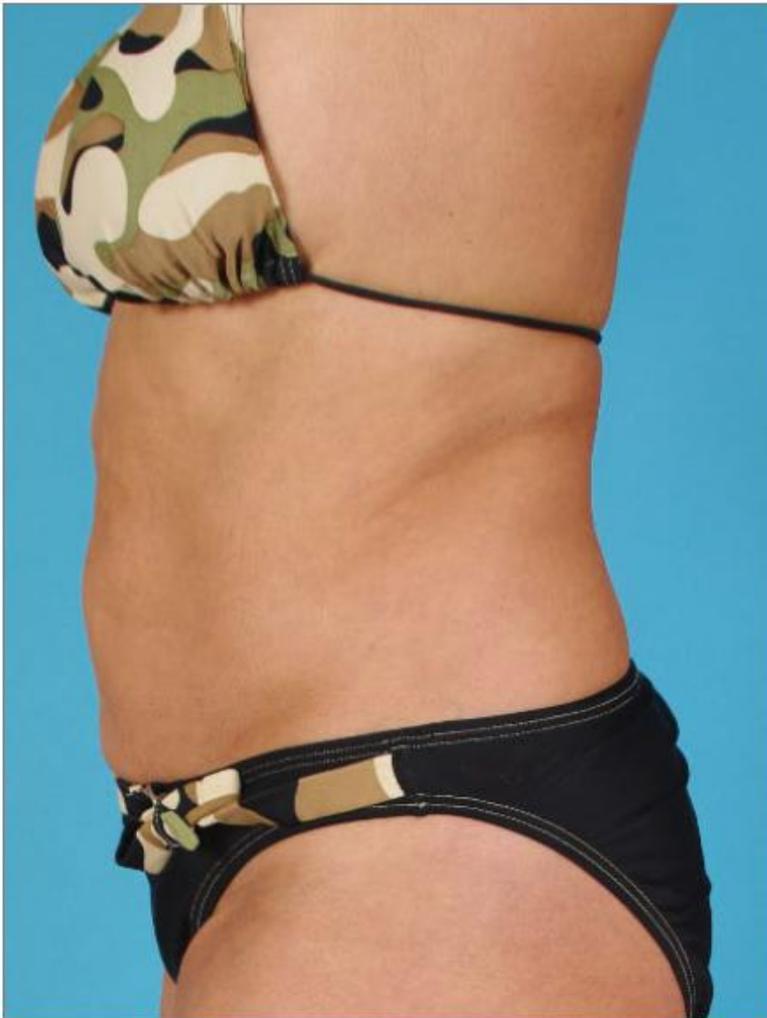

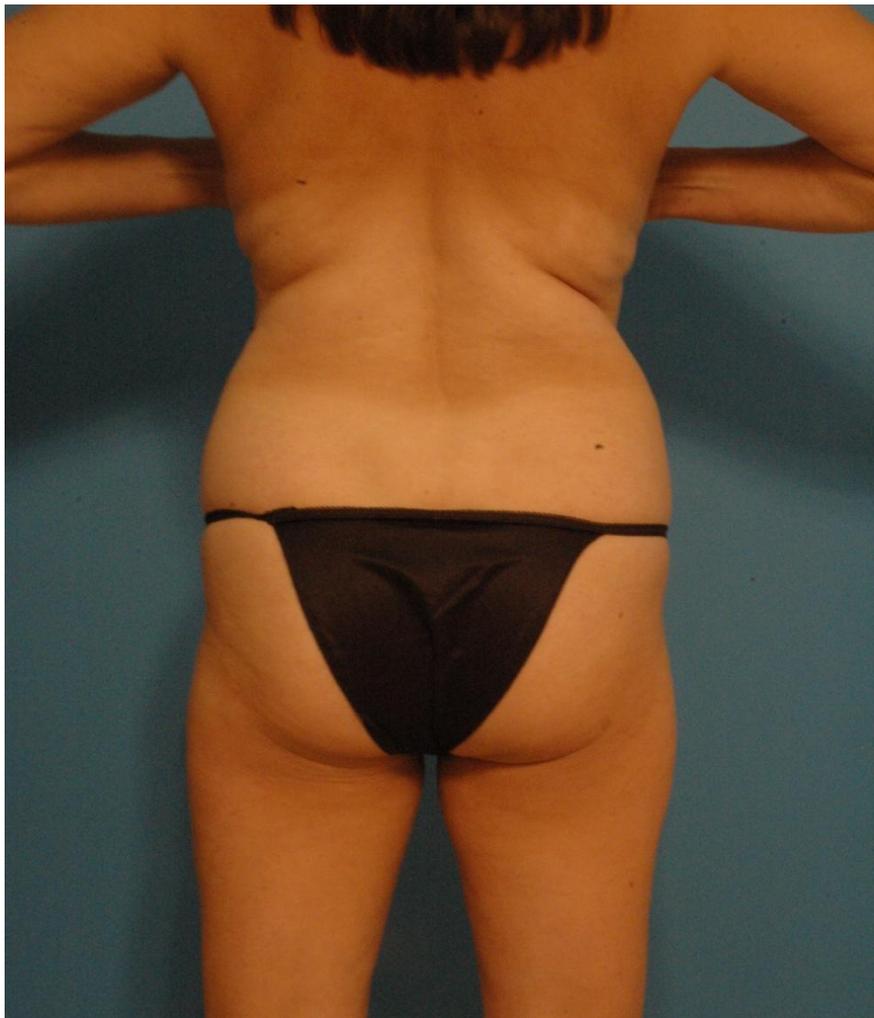

2 treatments

2 treatments

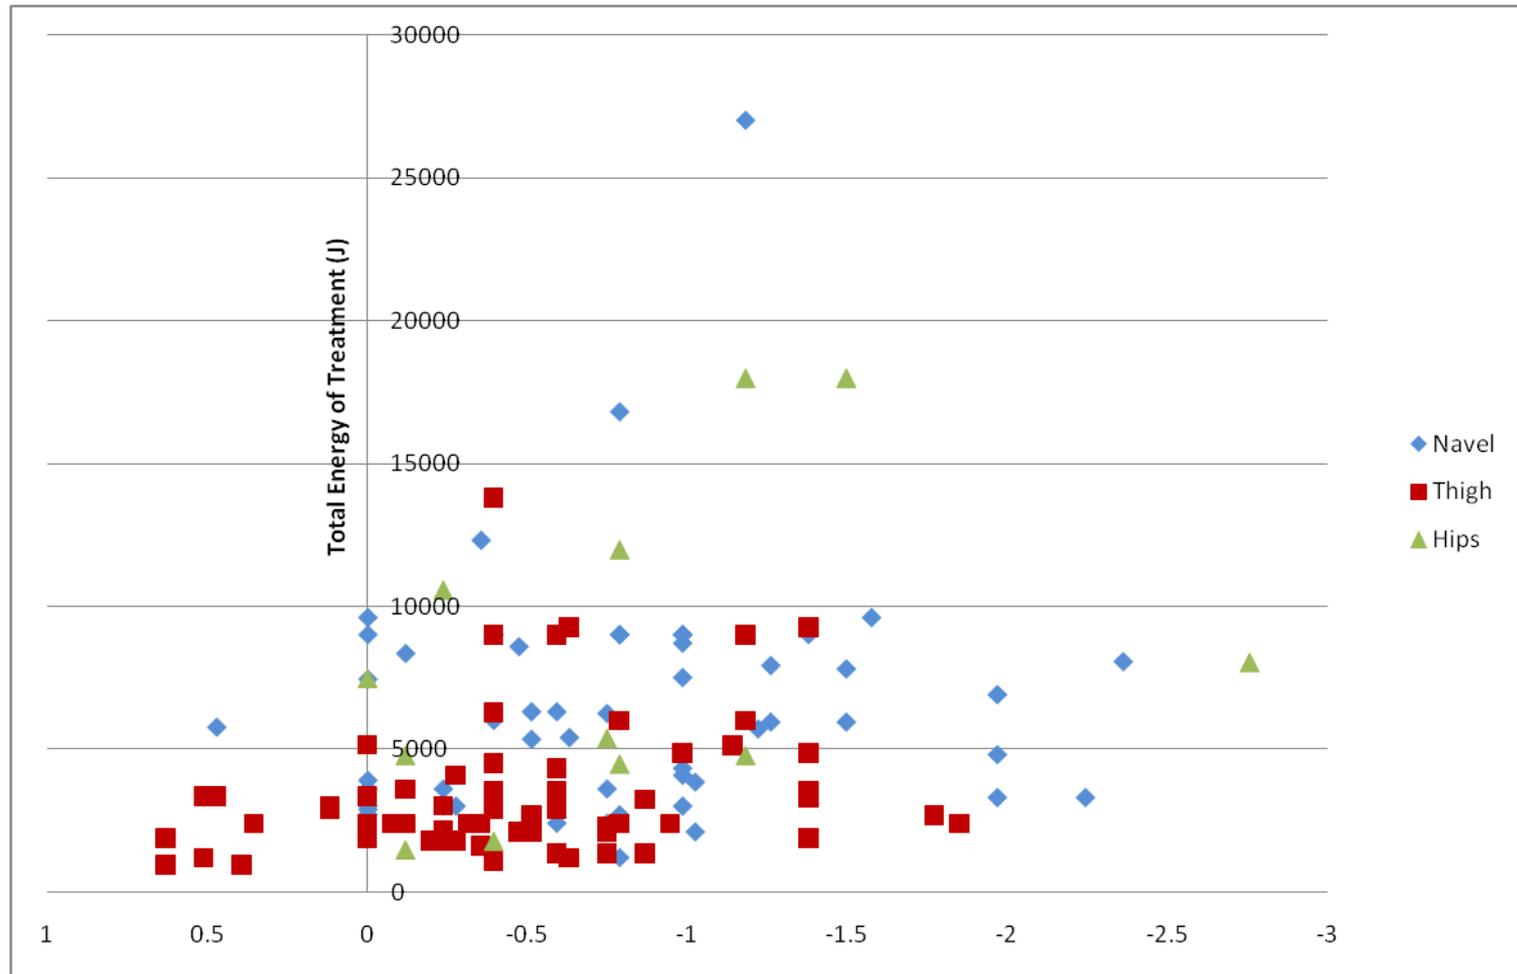

Results

- Effects
 - Seen immediately
 - Sustained – within reason
- Problems
 - Very few
 - Minor changes resolve quickly
- Keys
 - Patient selection
 - Treatment time
